

## Environmental Policy

Contract Resources is committed to managing its operations in an environmentally responsible and sustainable manner.

Our commitment is supported by:

- ensuring that environmental management is an integral part of our planning and decision-making process
- promoting ecologically sustainable principles and operational methods with our Clients, contractors and suppliers
- actively working to prevent pollution, minimise waste and manage our energy consumption
- improving our environmental performance through setting objectives, reviewing and monitoring our performance and initiating improvements to our management systems
- implementing awareness training programs to ensure that environmental roles and responsibilities are understood by all
- ensuring compliance with legislative requirements in all locations where we operate

The success of our commitment requires that every person working for or with the Company:

- is committed to our philosophy and objectives
- plans their work activities with due consideration to their responsibility in the proactive management of environmental conditions
- identifies opportunities to “reduce, reuse and recycle”
- reviews their work environment, identifies and reports non-conformances to enable the company to proactively respond to and manage non-conforming issues

The Chief Executive Officer is committed to and has responsibility for the implementation of this Policy and, is supported by the senior management team who are accountable for the application of the policy to their areas of responsibility.

**Adam Machon**  
Chief Executive Officer
