

Environmental Policy

Contract Resources is committed to protecting environmental integrity by managing its operations in an environmentally responsible and sustainable manner.

The Chief Executive Officer is committed to and has responsibility for the implementation of this Policy and is supported by the senior management team who are accountable for the application of the policy to their areas of responsibility.

Our commitment is supported by:

- Ensuring environmental management is an integral part of our planning, decision-making and risk management processes.
- Promoting ecologically sustainable principles and operational methods with our clients and other interested parties.
- Actively working to prevent pollution, minimise waste and manage our energy consumption.
- Continually improving our environmental performance through setting objectives, reviewing and monitoring our performance, seeking opportunities for improvement to our management system and processes.
- Implementing awareness and training programs to ensure that environmental roles and responsibilities are understood by all.
- Ensuring compliance with legal and other environmental requirements in all locations where we operate.

The success of our commitment requires that every person working for or with the Company:

- Is committed to our philosophy and objectives.
- Plans their work activities with due consideration to their responsibility in the proactive management of environmental conditions.
- Identifies opportunities to reduce, reuse and recycle.
- Reviews their work environment, identifies and reports non-conformances to enable the company to proactively respond to and manage non-conforming issues.

This policy will be made available to interested parties and the public, reviewed annually by senior management to ensure its continued relevance to the organisation, and reviewed four-yearly by the Board.

Adam Machon
Chief Executive Officer
